### COURSE DESCRIPTION:

All organisations today have to respond to a rapidly changing and increasingly threatening range of information security risks - risks which can, if unmitigated, lead to severe financial, regulatory and reputation damage for organisations.

ISO/IEC 27001 is an internationally recognised guidance document which identifies, manages and minimise a range of threats to business information. It provides the guidelines for implementing a constructive risk management process, setting up policies and ensuring that a secure infrastructure is in place.

### BENEFITS TO YOUR BUSINESS:

- Knowledge and skill to effectively understand and apply the requirements of the ISO/IEC 27001:2005 series Standard
- Understand the benefits of implementing ISO/IEC 27001:2005
